## PROFILE

An aspiring MERN stack developer specializing in Frontend. i am proficient in creating responsive layouts, implementing design systems, and developing interactive website using React Js, Eager to contribute creativity and technical skills to dynamic development projects.

## SKILLS

HTML5  |  CSS3  |  Javascript  |  Tailwind CSS  |  React JS  |  Node JS  |  Express JS  |  Mongoose

MongoDB  |  Git  |  GitHub

## PROJECTS

**StudyNotion-Ed-tech platform** ⧉                                   05/2023 – 07/2023
- StudyNotion is a fully functional ed-tech platform that enables users to create, consume, and rate educational content. The platform is built using the MERN stack, which includes ReactJS, NodeJS, MongoDB, and ExpressJS.

**Ecommerce App** ⧉                                                 08/2023 – 08/2023
- This is a small Ecommerce app using React JS, that includes user authentication, intuitive 'add to cart' functionality, and the convenience of removing products from the cart.

**Unplash Image Search** ⧉                                          08/2023 – 08/2023
- Developed React js app enables users to input queries, app utilizes Unsplash API to fetch and relevant images display it

**My Portfolio** ⧉                                                  07/2023 – 08/2023
- developed my portfolio using React JS, showcasing dynamic projects and honed skills in crafting interactive user interfaces.

**Weather App** ⧉                                                   03/2023 – 03/2023
- Created a responsive Weather App using HTML, CSS, and JavaScript, integrating with a weather API to display real-time weather data for user-specified locations. Designed for intuitive user experience and dynamic data visualization.
